*"Technology For The Environment"*

## COGENERATION TECHNOLOGY

***Let Our Equipment Pay You!***

### **Energy Recovery**

Condensing vapor back to liquid  
Recycle flare gas into renewable energy  
Converting waste energy to usable power

***Technology Proven Worldwide  
Approved For Hot Work Zones  
No Open Flame***

**FSI provides new POSSIBILITIES to increase your bottom line**

Greatly reduce or eliminate the need to flare  
Condense vapors into sellable products  
Return electrical energy to the grid

***The RSI Phoenix S.A.V.E™ controller monitors and adjusts process parameters to maintain stoichiometric combustion even while the generator module is producing electricity.***

***The end user is assured of safe, clean and continuous electrical power without impacting the integrity of the project.***
