

FIELD SPECIALTIES INC

"Technology For The Environment"

Innovative Environmental Solutions

Air Pollution Control

- Degassing of storage tanks
- Vacuum truck vapor control
- Industrial waste vapor processing

Soil and Ground Remediation

- Soil vapor extraction (SVE)
- Multi-phase extraction
- Ground water treatment

Energy Recovery

- Condensing Vapor back to liquid product
- Recycle flare gas into renewable energy
- Converting waste energy to usable power

FIELD SPECIALTIES INC. is a volatile organic compound (VOC) control and industrial degassing company that provides air pollution services for many of the most significant oil and chemical storage facilities in the USA.

SAFETY IS OUR SPECIALTY!

- No open flame
- Small foot print & portable
- Built in auto fire suppression system
- Removal rate efficiency greater than 99%
- No electrical connect or generator required
- Process high VOC concentrations per cubic foot
- Completely automated for unattended applications
- Wide range of auto safety system shutdown alarms
- Uses 100% of process vapor as primary fuel source
