"Technology For The Environment"

SOIL AND GROUND WATER REMEDIATION

Soil and Ground Remediation

- Soil vapor extraction (SVE)
- Multi-phase extraction
- Ground water treatment

US Air Force study says:

(Based upon the cost estimate provided in Section 3.4, ICE technology is similar to that of thermal and catalytic oxidation when influent concentrations range between 3,000 to 5,000 ppmv TVH. Above these concentrations, ICE technology becomes more cost-effective.)

Technology Proven Worldwide

Service Applications Include

- ✓ Soil Venting
- ✓ Free Product Removal
- ✓ Bio-Venting/Air Injection
- ✓ Spray Aeration Vacuum Extraction
- ✓ Bio-Slurping - Dual Phase Extraction
- ✓ Soil Vapor Extraction (SVE) the RSI Way

Skid unit in Grangemouth, Scotland
