and many others.

VAPORS CAN BE CONDENSED BACK INTO LIQUID FOR RECYCLING!

FSI Industrial Degassing

Field Specialties, Inc. uses unique technology and procedures to manage high concentrations of vapors from storage tanks, vacuum trucks exhaust, pipelines, sumps, ships, marine barges, soil & groundwater.

We also provide major advancements to removing heavy sludge with little or no slurry while simultaneously providing **VOC Vapor Destruction** without the use of carbon. Patents & Patents Pending

Our FSI crews consist of full-time personnel trained by WorkSafe and LPS to do their work safely and efficiently. FSI will do a professional job at a competitive price and keep your out-of-service time to a minimum.

Services Include

- Tank degassing before and during the tank cleaning operation
- Degassing of vacuum trucks, centrifuges & marine barges
- Vapor Destruction of pipelines, decommissioning
- Vapor Abatement services during plant turn-around
- Vapor Control during Product Change-Outs and Strip and Fills
- Emergency Response – Responding to your needs 24 hours/day, 7 days/week
