

**FIELD SPECIALTIES INC**  
"Technology For The Environment"

The EPC provides a safe, easy and clean answer to challenging line draining procedures.

## ProGreen® EPC Technology Environmental Process Containment

### A Green Safe Technology | Effective Transient Vapors Recovery For LDAR Process!

With safety, environment and cost efficiency a leading concern in today's business world, the EPC systems fit right in line with a "ProGreen® Program", the majority of waste water and buildup are contained when cleaning exchangers or loosening and removing bolts from an in-line flange for service. The system is under a constant vacuum during entire line drain process, producing an innovative product that provides protection for your crew during line service events.

**Innovative products that provides protection for your crew during line service events.**

**The system is under a constant vacuum during entire line drain process.**

**100% containment for liquid vapor and debris.**

### Environmental Control During Line Draining

- Eliminates Slurping
- Under Constant Vacuum
- Reduces Project Duration
- Controls Liquids And Vapors
- Reduces Air Flow To 50 SCFM With 411 GPM
- Reduces Risk & Exposure To Employees And The Environment
